INTRODUCTION AND SCOPE

Journal of Psychiatry and Brain Science has been published for 10 years since its inception in 2015. During this period, the journal has received strong support and guidance from neuroscience colleagues worldwide, steadily improving its quality year by year. Articles spanning basic and clinical psychiatry, applied psychology, novel research ideas, techniques, tools, analytical methods, and cutting-edge neuroscience advances contributed by internationally renowned scholars and scientifically trained young researchers—have significantly advanced the discipline while enhancing the journal's impact.

In recognition of these achievements, we are pleased to announce a special issue on "Progress in Psychiatry and Brain Science". This collection will feature high-quality research works and literature reviews in these fields.

We sincerely invite you to submit your original research papers, as well as reviews or comments on current hot topics. Topics include, but are not limited to:

- 1. Etiology, pathological mechanisms, diagnosis, and treatment of mental disorders;
- 2. Adolescent mental health;
- 3. Brain development, brain structure, and functional assessment methods and tools.

ARTICLES GUIDANCE

We seek original research papers, in-depth reviews, and perspective articles that present novel findings, conceptual breakthroughs, or methodological advancements pertinent to psychiatry and brain science. The submission deadline is set for 31 December 2025. All publications will be open access and available online. Publication fees will be fully waived for papers submitted to this special issue.
